

Figure 1
Distribution of Natomas Basin Acres, Including 2018 Estimates and Projections

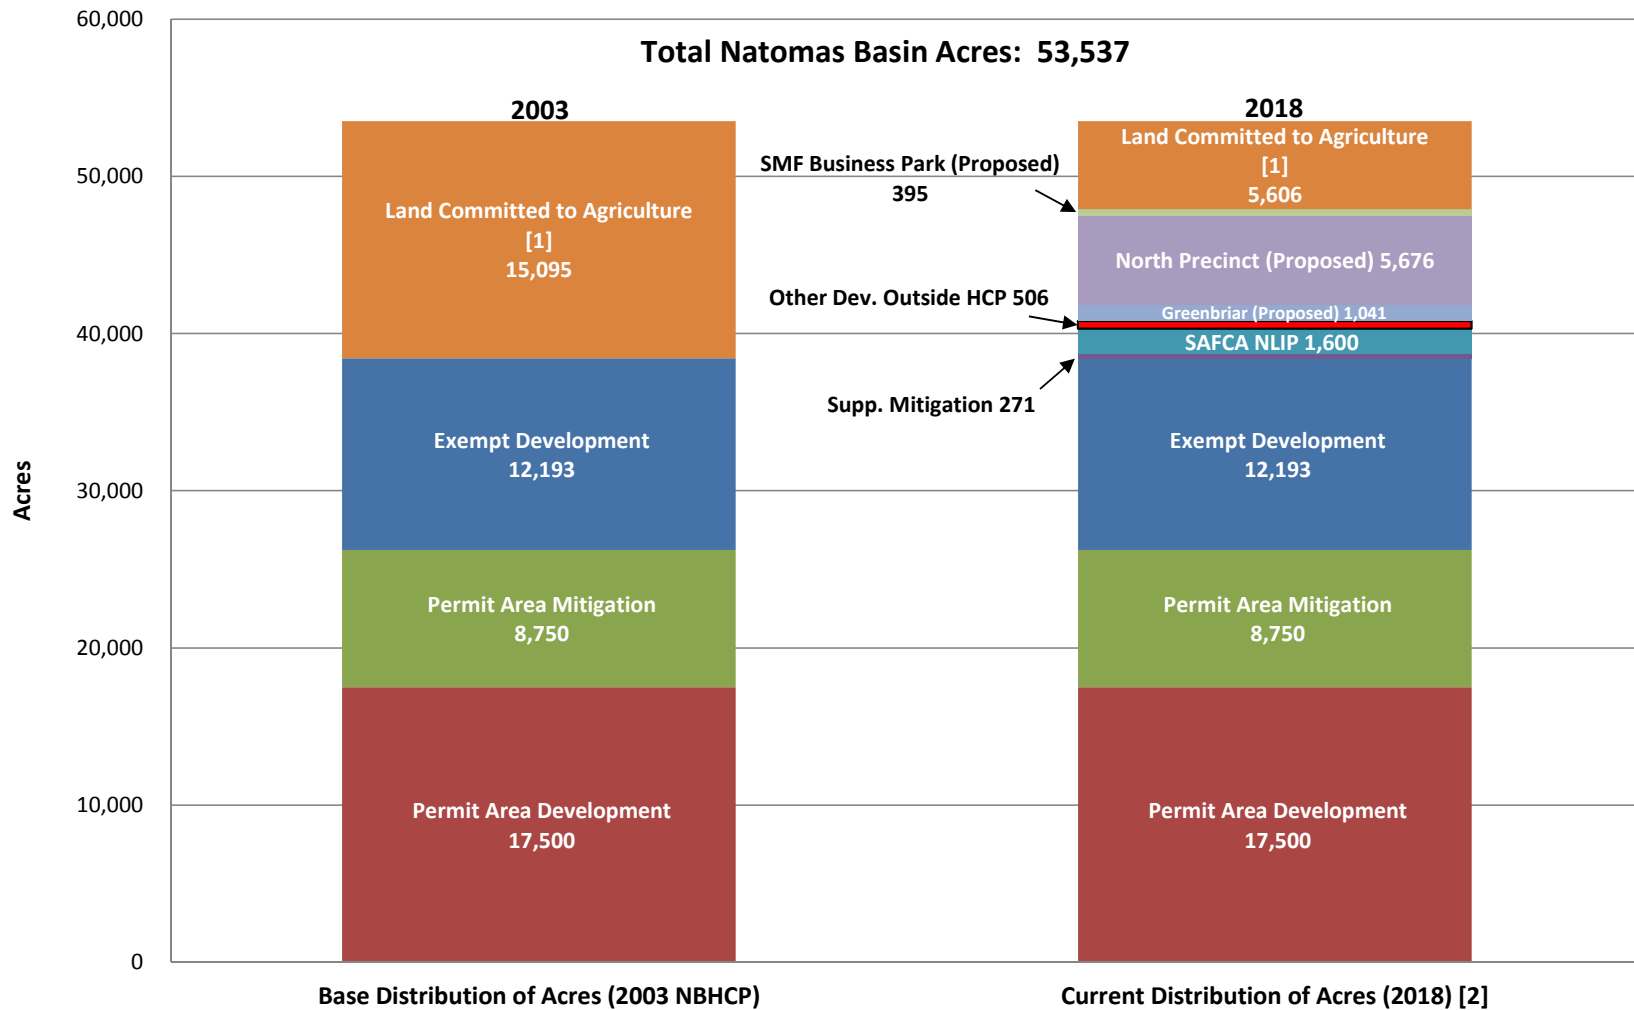

chart1

[1] The most recent Federal court decision regarding the NBHCP, dated September 7, 2005, states:

"The NBHCP, BiOp, EIR/EIS, and Findings and Recommendations are all predicated on the assumption that development in the Basin will be limited to 17,500 acres and that the remaining land will remain in agricultural use." (p.30, footnote 13)

[2] Acres subtracted from the Land Committed to Agriculture portion of the 2018 bar includes projects that include and don't include mitigation.
