

EXECUTIVE DIRECTOR'S REPORT

A white egret is captured in mid-flight, its wings fully extended, showing the intricate structure of the feathers. The bird is positioned in the center-right of the frame, facing right. Its long, thin neck is elegantly curved. The background is a soft-focus landscape of tall, dry grasses in the foreground and a green field under a clear blue sky. The overall scene is bright and natural.

Proposed Colusa-Sutter Transmission Line Project

SMUD Cancels 500-Kilovolt Transmission Line Project

Effective as of March 1, 2019, the proposed Colusa-Sutter (CoSu) 500-kilovolt transmission line project is canceled. Accordingly, the release of the Draft Environmental Impact Statement/ Environmental Impact Report, planned for public release in mid-2019, is also canceled.

Since 2015, the Sacramento Municipal District (SMUD) and the Western Area Power Administration (WAPA) have been working on CoSu, evaluating potentially significant environmental impacts to decide whether to proceed with final design and construction. The proposed 500-kilovolt transmission line would have connected the California–Oregon Transmission Project (COTP) to SMUD’s or WAPA’s transmission facilities on the west side of the Sacramento Valley.
