

MEMORANDUM

To: John Roberts and Kim Burns, The Natomas Basin Conservancy
From: Allison Shaffer, Sean Fisher, and Jamie Gomes
Subject: Natomas Basin Habitat Conservation Plan Fee Update—2021;
EPS #202094
Date: November 24, 2020

Introduction

Economic & Planning Systems, Inc. (EPS) has updated the Cash Flow Model (model) used to estimate the Natomas Basin Habitat Conservation Plan (NBHCP) mitigation fee (fee). This memorandum details the updated cost and revenue assumptions used to derive the proposed 2020 fee.

The fee contains components for the following five funds:

- Land Acquisition
- Restoration and Enhancement (R&E)
- Administration/Operations and Maintenance (Admin/O&M)
- O&M Endowment
- Supplemental Endowment

Figure 1 illustrates the purpose of and interaction among the five fee components. **Table 1** summarizes the fee history for each of the five components since the fee was implemented in 1996. **Table 2** summarizes the fee-funded cost per acre of habitat and the proposed fee by fee component. The proposed fee is based on the assumed current NBHCP mitigation requirement of one-half acre of mitigation land for each gross acre of developed land. **Table 3** estimates the percentage change in each fee component for the proposed 2021 fee as compared to the current fee.

A cash flow analysis was developed for each fund to estimate the annual revenues, expenditures, and balances that inform the fee estimates. **Table 4** summarizes these cash flow analyses, which are further detailed in **Appendix A**.

The assumptions used in the cash flow analysis are presented in **Tables 5** through **19**. **Table 20** shows The Natomas Basin Conservancy (TNBC)'s proposed 2021 budget (2021 Budget). For comparison purposes, this budget table also shows the estimated 2020 revenues and expenditures, as well as the source of the 2020 estimates.

Both the 2020 and 2021 budget amounts in **Table 20** are reflected in the cash flow tables. The budget amounts are based on a variety of factors, including model assumptions, experience by TNBC with particular activities, expected development, and TNBC's knowledge of other expected activities in the coming year. The 2021 Budget contains a discussion of the source of each revenue and cost estimate.

Proposed 2021 Fee

The table below shows the fee history and the proposed 2021 fee.

Year	Total Mitigation Fee	Less Land Cost Portion	Total Mitigation Fee Excluding Land Cost Portion [1]	Pct. Change in Total Mitigation Fee	Pct. Change in Mitigation Fee Excluding Land Cost Portion
<i>per acre</i>					
1996/97	\$2,240		\$2,240		
1998	\$2,656		\$2,656	18.6%	
1999	\$3,292		\$3,292	23.9%	
2000	\$3,941		\$3,941	19.7%	
2001	\$10,021		\$10,021	154.3%	
2002	\$11,962		\$11,962	19.4%	
2003	\$12,270	(\$4,500)	\$7,770	2.6%	
2004	\$16,124	(\$7,500)	\$8,624	31.4%	11.0%
2005	\$24,897	(\$12,500)	\$12,397	54.4%	43.7%
2006	\$41,182	(\$22,500)	\$18,682	65.4%	50.7%
2007	\$38,445	(\$20,000)	\$18,445	(6.6%)	(1.3%)
2008	\$38,133	(\$17,500)	\$20,633	(0.8%)	11.9%
2009	\$38,133	(\$17,500)	\$20,633	0.0%	0.0%
2010	\$44,050	(\$17,500)	\$26,550	15.5%	28.7%
2011	\$37,547	(\$15,000)	\$22,547	(14.8%)	(15.1%)
2012	\$32,861	(\$11,250)	\$21,611	(12.5%)	(4.2%)
2013	\$27,419	(\$8,750)	\$18,669	(16.6%)	(13.6%)
2014	\$32,259	(\$11,250)	\$21,009	17.7%	12.5%
2015	\$32,259	(\$11,250)	\$21,009	0.0%	0.0%
2016	\$32,259	(\$11,250)	\$21,009	0.0%	0.0%
2017	\$31,600	(\$11,250)	\$20,350	(2.0%)	(3.1%)
2018	\$33,091	(\$11,250)	\$21,841	4.7%	7.3%
2019	\$33,091	(\$11,250)	\$21,841	0.0%	0.0%
2020	\$40,032	(\$15,000)	\$25,032	21.0%	14.6%
2021 (proposed)	\$40,673	(\$15,000)	\$25,673	1.6%	2.6%

The fee currently charged by the City of Sacramento (City) is \$40,032 per acre of development. The proposed fee for 2021 is \$40,673 per acre, which is \$641 per acre greater than the current fee. Nearly all mitigation land, however, is acquired by TNBC through land dedication because all but a few small-acreage fee payers are required to dedicate land in lieu of paying the land cost portion of the fee. The City Council re-authorized this land dedication requirement without a sunset provision at its February 13, 2007, meeting. The proposed 2021 balance of the fee (non-land acquisition portion) to fee payers is \$25,673 per acre, which is also \$641 greater than the current fee amount of \$25,032 per acre.

Table 3 estimates the change in the fee from the current level for each fee component. The proposed 2021 fee represents a small increase from the 2020 fee level. As detailed later in this memorandum, this fee increase is largely attributable to an increase in administration and operations and maintenance costs.

EPS reconciled the actual account activity through 2019 with TNBC's audited financial statements and updated cost and revenue assumptions for future years. The updated cost and revenue assumptions are detailed in the following section.

Updated Model Assumptions

The updated fee was estimated using a revised cash flow analysis prepared by EPS for each of the five funds. For each fund, EPS both reconciled the actual account activity through 2019 with TNBC's financial statements and updated cost and revenue assumptions for future years. Many of the changes reflect new estimated costs and revenues based on recent experience and input from TNBC. The updated assumptions are described below.

Cash Flow Adjustments

Table 4 summarizes the cash flow analyses for each of the five funds. Detailed cash flow analyses for each fund are provided in **Appendix A**.

In each cash flow analysis, EPS updated costs and revenues for 2019 through the end of the 50-year NBHCP timeframe in 2053. The updates for particular years and ranges of years are described below.

2019

In each cash flow analysis, EPS reconciled 2019 account activity to TNBC's 2019 end-of-year audited financial statements to reflect actual revenues and expenditures. These reconciliations resulted in a combined fund ending balance in 2019 that was approximately \$1.2 million greater than projected in the previous year's model. This difference between the projected and actual fund balances was primarily due to modestly greater fee revenue and investment earnings in all funds, as well as lower administration and operations and maintenance costs than projected in the prior year's model. The lower costs accounted for approximately \$500,000 of the increased fund balances, while the higher revenues accounted for the remaining \$700,000.

2020

As discussed previously, the source of each of the 2020 revenue and expense amounts is shown in the 2021 Budget Proposal table (**Table 20**). The revenue and expense estimates are further detailed below.

Revenues

All fee revenues were updated to reflect the activity through September 2020, the last month for which financial statements were available. Additional fee revenue was not projected because TNBC did not expect any additional fee revenue through the end of the year.

Similarly, investment income was updated to reflect the activity through September 2020. To be conservative, no further investment income was projected through the end of the year for the Land Acquisition, R&E, and Admin/O&M accounts. The investment income for the O&M Endowment and Supplemental Endowment funds was increased from the September 2020 amounts to estimate an additional three months of income based on the average monthly earnings through September 2020.

The 2020 farm rent revenue was updated to reflect the anticipated revenue for farms under contract with TNBC in 2020. In addition, TNBC receives other miscellaneous revenue, which could include various reimbursements, hunting revenue, and contract payments. The 2020 miscellaneous income amount was updated to reflect the activity through September 2020 and TNBC's estimate of additional revenue through the end of the year. TNBC has estimated that it will receive a total of approximately \$552,000 in 2020 from participation in the Natomas Central Mutual Water Company (NCMWC) groundwater exchange program. The 2020 estimated miscellaneous income is much greater than in a typical year because of the NCMWC groundwater exchange program revenue.

Expenses

There were no expenses incurred in the R&E fund in 2020. The only expenses incurred in the O&M Endowment fund were management fees. The Supplemental Endowment fund expenses included management fees, as well as land acquisition costs (discussed below). The 2020 management fees for both endowment funds were updated to reflect the activity through September 2020, as reported on the September 2020 financial statements, plus estimates of remaining 2020 management fees based on the average monthly costs through September. The September 2020 account statements were used because they were the most current statements available.

In 2020, TNBC acquired five new properties totaling 513 acres. Two of the properties were purchased by TNBC for approximately \$6.9 million. Another two of the properties were acquired by TNBC through land dedications, and the fifth property was a conservation easement. Of the total \$6.9 million in land acquisition expenses, approximately \$3.5 million was funded directly from Land Acquisition fund revenues, \$2.0 million was funded from a line of credit from the City of Sacramento, and \$1.4 million was funded from Supplemental Endowment fund revenues.

TNBC began making payments on the City line of credit in 2020, using land acquisition fee revenue from City fee payers. In total, TNBC made loan payments of approximately \$69,500 in 2020. A new table was added to the Cash Flow Appendix (**Table A-5**) to model the projected repayment of the City line of credit, which will be repaid with Land Acquisition fund fees from City fee payers.

It is anticipated (and depicted in the Land Acquisition and Supplemental Endowment fund cash flow tables) that the \$1.4 million in Supplemental Endowment fund revenues used to purchase the 2020 habitat acquisitions will be fully repaid from the Land Acquisition fund to the Supplemental Endowment fund over the next two years.

In the Admin/O&M fund, where there are substantial ongoing Admin/O&M costs each month, the 2020 expenses were based on the costs incurred through September 2020 and TNBC's estimates of remaining costs for the year. The cost estimates were based on TNBC's in-depth knowledge of the annual costs, contracts, and leases.

2021

The 2021 revenue and expense amounts for all funds were obtained from the proposed 2021 Budget (see **Table 20**).

2022 through 2053

In each cash flow analysis, the revenue and cost estimates for 2022 through 2053 were updated to reflect the updated model assumptions presented in **Tables 5** through **19** and discussed in the remainder of this memorandum.

Cost Assumptions

Tables 5 through **19** detail the assumptions used to estimate costs for 2021 and later.

Land Acquisition Costs

Table 5 shows the land acquisition cost assumptions used to derive the Land Acquisition fee. The estimated land acquisition cost per acre was kept at \$30,000 per acre this year, with no change from the 2020 model. This cost estimate is taken from a broad range of potential land values in the Natomas area and is based on TNBC's knowledge of confirmed recent land transactions, supported by a projection of land price costs prepared by a Member Appraisal Institute (MAI) Appraiser in October 2020. The opinion expressed by the MAI appraiser is that habitat land in the unincorporated area of the Natomas Basin will sell for \$25,000 to \$31,000 per acre through 2020 and for \$30,000 to \$33,000 per acre in 2021. With this and other information, TNBC chose to keep the value at \$30,000 per acre in this year's model. Land transaction and contingency cost estimates also remain unchanged at \$1,500 per acre.

A change was made in this year's model to more closely track actual land acquisition by TNBC. In past models, it was assumed that all fee payers would pay Land Acquisition fees and that TNBC would purchase all habitat land with this fee revenue. In practice, however, the majority of fee payers dedicate land in lieu of paying the Land Acquisition fee. To reflect this level of land dedication, the model now assumes that only 15 percent of fee payers will pay the Land Acquisition fee, the remaining 85 percent of fee payers will dedicate habitat land, and TNBC will purchase only 15 percent of the required habitat. Because the lower Land Acquisition fee revenues are offset by lower costs, there is no noticeable impact on the overall NBHCP fee.

R&E Costs

Table 6 shows the R&E cost assumptions used to derive the R&E fee. The R&E costs are estimated at \$2,822 per habitat acre. These costs are equal to the costs calculated in the 2020 model.

Base R&E Costs

The costs of converting rice acres into upland and marsh acres were kept at the same levels as in the 2020 model.

The cost to convert rice acres into managed marsh was estimated at \$9,000 per acre. Because managed marsh will represent 25 percent of the total acquired acres, the conversion cost was multiplied by 25 percent to arrive at a cost of \$2,250 per acquired habitat acre.

The cost to convert rice acres into upland acres was estimated at \$300 per acre. The conversion cost is applied to the number of projected acres that need to be converted from rice to upland to reach the 25 percent upland requirement. As it is assumed that only 10 percent of the acquired habitat is upland, an additional 15 percent would need to be converted to upland. Thus, the conversion cost was multiplied by 15 percent to arrive at a cost of \$45 per acquired habitat acre.

Biological Site Assessment and Preconstruction Survey Costs

The cost to conduct a formal biological site assessment and preconstruction survey for acquired mitigation land, as required by the 2003 NBHCP, was estimated at \$270 per habitat acre, the same estimate as in the 2020 model. This cost per acre is based on a total cost of \$27,000 per habitat acquisition and an estimated 100 acres per acquisition.

Contingency Costs

The contingency component of the R&E costs is essential to ensure adequate funding for R&E, particularly given the lag time between when the fee is paid (and the habitat preserves are acquired) and when the R&E actually occurs. TNBC has three years to restore and enhance the designated preserves after approval of the Site-Specific Management Plan (SSMP), which comes one year after acquisition. Biological studies also need to be completed within that time frame. A ten percent contingency is assumed, which is consistent with the 2020 model.

Admin/O&M and O&M Endowment Fund Cost Estimates

The assumptions used to estimate the Admin/O&M and O&M Endowment costs are summarized in **Table 7** and discussed below. The Admin/O&M and O&M Endowment fee components together provide funding for the Admin/O&M costs through the end of the NBHCP in 2053. The net remaining costs from 2022 through 2053 to be funded by these fee components (after accounting for land lease and miscellaneous revenue) increased by approximately 2.3 percent from the net costs in the 2020 model.

The cost increase was largely attributable to an increase in remaining administration costs and habitat maintenance costs (2022 through 2053), which increased by approximately 9.6 percent and 17.2 percent, respectively. The administration costs increased primarily because of the addition of a new TNBC staff position needed to perform additional administration tasks required because of the growth TNBC recently experienced and expects to continue to experience. The habitat maintenance costs increased due to updated land maintenance contract costs reflective of new land maintenance pricing resulting from a competitive process to select a new contractor for a three- to five-year contract.

There was also a substantial decrease in estimated remaining property taxes of approximately 11.2 percent that partially offset the administration and habitat maintenance cost increases. As a result, there was only a small overall increase in the total costs for all of the Admin/O&M components combined. Future property taxes decreased because a large amount of habitat (over 513 acres) was acquired in 2020, locking in property taxes at an estimated lower level than if the habitat had been acquired in later years, as projected in the previous model.

O&M Costs

O&M costs are divided into the following three categories:

- O&M costs included in the land maintenance contract for managing the marsh portion of the mitigation land.
- Annual O&M costs not included in the land maintenance contract.
- Estimated TNBC costs for replacing fixed assets.

As summarized in **Table 7**, the O&M land maintenance cost per acre is estimated as the 2021 land maintenance contract amount divided by the current number of marsh acres. This cost per marsh acre is multiplied by the annual number of marsh acres to estimate the annual land maintenance costs. This method represents a change from the 2020 model, where the land maintenance cost per acre was estimated as the total land maintenance contract amount divided by the total habitat size in acres. The cost was then applied to the total annual number of habitat acres to estimate the annual land maintenance costs. For this 2021 model, it was determined that it would be more accurate to base the annual costs on the number of marsh acres since the land maintenance contract is for the maintenance of marsh acres only.

The land maintenance contract amount increased from an estimated \$330,000 in the 2020 model to \$399,600 in the 2021 model, resulting in an increase in the land maintenance cost per marsh acre of approximately 21 percent.

Table 8 shows the ongoing O&M costs that are not part of the O&M land maintenance contract. These costs were updated based on estimates from TNBC. These costs remained almost unchanged from the 2020 model. However, as the habitat size increased, the costs per habitat acre decreased by approximately 11 percent.

Table 9 includes an accounting of TNBC's fixed assets for which replacement costs are estimated. This table shows the original fixed asset costs, as well as the costs updated to 2021 levels, using a three percent annual inflation rate to estimate the current replacement costs for the fixed assets. These costs also remained almost unchanged from the 2020 model, increasing very slightly because of the addition or removal of some fixed assets. Again, as the habitat size increased, however, the costs per habitat acre decreased by approximately 10 percent.

Special Assessments

Special assessments consist of Natomas Central Mutual Water Company (NCMWC), Bureau of Reclamation, and Reclamation District 1000 (RD-1000) costs. These special assessment costs constitute a significant portion of the Admin/O&M costs and are summarized in **Table 7** and discussed below.

NCMWC Costs

The NCMWC cost estimate per habitat acre is detailed in **Table 10**. The current assumptions concerning the NCMWC rates and the entity that is responsible for the payments are summarized below:

- The rates shown on **Table 10** are based on the NCMWC 2020 published rates. It is anticipated there will be a rate increase in 2021, so the 2020 rates for all NCMWC components have been increased by three percent to estimate the rates in 2021 dollars. In addition, it is assumed that 15 percent of the acres will be excluded from NCMWC assessments.¹
- For rice acreage, it is assumed that TNBC will pay the administration and standby service charges only, while the farmers will be responsible for paying the annual water toll and winter water charges directly to NCMWC. TNBC is required, as stated in the 2003 NBHCP, to ensure that rice is produced on mitigation land. For this purpose, TNBC has included an allowance to fund farmer defaults on NCMWC payments, estimated at five percent of all farmer paid costs.
- For uplands acreage, it is assumed that TNBC will pay the administration and standby service charges only, while the farmers will be responsible for paying the annual water toll and winter water charges directly to NCMWC.
- TNBC pays the full cost of water applied to managed-marsh complexes.

Bureau of Reclamation Costs

The Bureau of Reclamation provides water services to the Huffman West and Lauppe South properties at an amount of approximately \$6,400 annually. As this results in a negligible cost when assessed on a per-acre basis, there is no additional adjustment to the select special assessments cost per acre for this service.

¹ TNBC's Finance Model now contemplates that 15 percent of TNBC's land holdings will not be assessed the NCMWC tariff rate. The 15-percent factor is used in this calculation because not all land owned by TNBC lies in the NCMWC service area; therefore, the acreage outside the NCMWC service area would not incur NCMWC charges. This 15-percent factor for excluded land is used as an approximation in lieu of attempting to calculate and accurately predict many dynamic variables. Accounting for all variables could subject the Finance Model to risk levels believed by TNBC management to be unacceptable. These variables include the fact that decisions often are made late to fallow crop land or change from one crop to another, which would influence the amount of charges assessed by NCMWC. The Finance Model also does not reflect any late-year demand for water because of precipitation and other hydrological conditions, which largely are unpredictable. The Finance Model does not account for as-yet-made determinations regarding ground water well substitution (from TNBC wells) over NCMWC-supplied water, which is somewhat dependent on the ultimate NCMWC-approved tariffs and the breakdown between water usage charges and other components of the NCMWC fee structure. Moreover, a substantial portion of the total water costs assessed by NCMWC is assessed on shareholders of the NCMWC, regardless of whether they purchase irrigation water or not; this variable has not yet been published by the NCMWC Board of Directors but is expected to be different from those in recent years. It is assumed the generalized approach noted above (85 percent of total landholdings are assessed NCMWC charges per acre per year) is adequate to estimate future water cost-recovery needs.

RD-1000 Costs

Table 11 details the RD-1000 annual cost per acre for 2019, 2020, and 2021. The 2019 and 2020 amounts are actual costs based on property tax bills. The 2021 cost is estimated as the total RD-1000 levy on the 2020/2021 property tax bills. For the purposes of estimating annual costs in future years, the 2021 cost is divided by the habitat size in acres to obtain a cost per acre.

Property Taxes

The land acquisition cost per acre is estimated at \$30,000 based on a projection of land price costs prepared by an MAI Appraiser in October 2020, which indicated a potential range of land price costs from \$30,000 to \$33,000 per acre in 2021. This cost is equal to the land acquisition cost per in last year's model. It is anticipated that land values generally will continue to increase over time. The method of estimating property taxes was changed in 2010, both to adequately capture the projected increasing cost and assessed value of new habitat land, as well as to reflect the recent suspension of state funding to support the Williamson Act. Some additional changes for estimating habitat property taxes were made in subsequent years. The current method of projecting property taxes is described below, and the property tax calculations are detailed in **Table 11** and **Table 12**:

- **Existing Habitat Properties.** The property taxes for existing habitat properties are detailed in **Table 11**. The 2020 property taxes are based on the actual property taxes reported on the fiscal year 2019/2020 and 2020/2021 tax rolls. The 2021 property taxes are composed of the following three components:
 - Property taxes on the fiscal year 2020/2021 tax roll, including the addition of two of five new properties acquired in 2020.
 - Estimated property taxes for another two of the five habitat properties acquired in 2020 that do not yet appear on the tax roll. *Note that the fifth property acquired in 2020 is a conservation easement, for which TNBC does not pay property taxes.*
 - A three percent contingency to address the uncertainty of maintaining reduced property tax levels for Williamson Act properties, as discussed below.

In 2014, Sutter County instituted the option to decrease Williamson Act contracts from ten years to nine years, as permitted by state law. This option caused an increase in the property taxes on Sutter County properties with Williamson Act contracts. The annual increase has been included on property tax bills since the 2014/2015 tax year. Although California Senate Bill (SB) 1265 (the reduction in Williamson Act contract lengths) was set to expire at the end of 2015, another Senate Bill (SB 1353) was enacted in September 2014 that incorporated reduction of the contract lengths into the Williamson Act with no termination date. Therefore, it is assumed in the model that this provision will be extended indefinitely, and the Sutter County tax burden will continue at the higher rates. Additionally, property taxes could increase in Sacramento County if it also chooses the option to decrease the length of Williamson Act contracts.

- **Future Habitat Properties.** **Table 12** details the estimated property taxes for 2021 and beyond. This table includes the property taxes for both existing and future projected habitat.

In light of the loss of state funding for Williamson Act contracts, TNBC staff believes that new properties will not be granted Williamson Act contracts. Consequently, the annual property taxes

for future habitat still to be acquired are calculated as 1.3 percent of the estimated full assessed value of future habitat. This factor consists of the one percent property tax and an additional 0.3 percent to cover the additional taxes and assessments on the property tax bills. The only assessment not included in the 0.3 percent is the RD-1000 assessment, which is accounted for separately in the O&M costs discussed previously.

From 2022 on, the model is based on the assumption that, on average, mitigation land acquisition costs will escalate by three percent annually, net of inflation, and the assessed value per acre of new habitat acquisitions will track this three percent escalation. TNBC believes the three percent net increase closely reflects the actual average increases in habitat land values in the region over the past decade. Annual taxes on new properties are estimated at 1.3 percent of the average assessed value per acre multiplied by the number of new habitat acres.

Mitigation Monitoring and Adaptive Management Costs

Table 13 shows the mitigation monitoring and adaptive management costs, which are divided into three categories, as summarized below:

- Biological Effectiveness Monitoring Costs: Costs from the 2021 biological effectiveness–monitoring contract.²
- Other Costs: Connectivity and adaptive management review costs.
- Midpoint Program Review: Costs associated with the required program reviews when development reaches the half-way point of 8,750 acres, currently projected in 2027.

Other than the costs associated with the NBHCP-required midpoint program reviews, the pre-acquisition biological reconnaissance (included as a Land Acquisition cost), and the SSMPs (shown in **Table 7** and discussed below), all mitigation monitoring costs are inflated by three percent every five years after 2022 until habitat buildout to reflect both likely cost increases, as mitigation land acreage increases to 8,312.5 acres (the ultimate buildout level of the 2003 NBHCP less an adjustment made for undevelopable acreage as described below), and anticipated increases in labor and related monitoring costs throughout the life of the NBHCP. The monitoring cost increases are estimated to occur every five years because the monitoring contracts tend to last for five years with cost increases occurring with each subsequent contract.

SSMP Costs

The annual SSMP costs are unchanged from the estimates in the 2020 Model (see **Table 7**). The annual cost of preparing SSMPs for acquired mitigation land is estimated at \$160 per acquired acre in the year of acquisition only. The annual SSMP update cost is estimated at \$25,000 per year, based on TNBC's experience with preparing SSMPs.

² Currently, ICF International (formerly Jones & Stokes) is conducting all the biological effectiveness monitoring on behalf of TNBC.

Administrative Costs

Annual administrative costs were revised based on TNBC's current budget estimates. The costs include a five percent contingency for 2021 and all subsequent years. **Table 14** shows the 2019, 2020, and projected 2021 through 2053 administrative costs.

For all administrative costs except the contract costs, it is assumed that the annual costs for 2021 and beyond will equal the 2020 costs. The contract costs for 2021 and beyond were separately estimated by TNBC based on expected ongoing contracts. These contract costs are detailed in **Table 15**.

The total administrative costs for 2022 and beyond are estimated at \$1.4 million annually, which is lower than the estimated 2020 administrative costs and the budgeted 2021 administrative costs but represents an increase of approximately 9.6 percent from the projections in the prior 2020 model (see prior detail).

Endowment and Supplemental Endowment Fund Management Fees

TNBC's fund management fees are calculated as 0.5 percent of the first \$5 million of the O&M Endowment and Supplemental Endowment combined fund balances, plus 0.35 percent of the remainder of the combined fund balances, resulting in increasing fees as the fund balances increase. The model reflects this calculation for all future years through the end of the TNBC timeframe in 2053, as detailed in the O&M Endowment and Supplemental Endowment cash flow tables.

Supplemental Endowment Cost Estimates

The Supplemental Endowment fund serves two purposes and is divided into two components: the Land Purchase Contingency component and the Changed Circumstance Contingency component. The Land Purchase Contingency component provides for acquisition of the last 200 acres of habitat, and the Changed Circumstance Contingency component is to be used in the event of unforeseen circumstances, such as a natural disaster.

Supplemental Endowment costs primarily are driven by the Land Acquisition cost assumption, estimated at \$30,000 per acre in this year's 2021 model, the same level as in the prior 2020 model. However, since the Supplemental Endowment fund balance increased more than anticipated because of greater than anticipated investment earnings in 2020, the remaining funds needed to acquire the last 200 acres decreased slightly, resulting in a small decrease in the Supplemental Endowment costs to be funded by fees from \$1,285 per habitat acre in the 2020 model to \$1,252 per habitat acre in this 2021 model (a 2.6-percent decrease; see **Table 16**). Note that the Supplemental Endowment fund balance does not include a deduction of the \$1.4 million used in 2020 to purchase habitat (discussed earlier) under the assumption that these funds will be repaid from the Land Acquisition fund to the Supplemental Endowment fund in the next two years.

Note that it is assumed in the model that the Land Acquisition fund is used to purchase the entire required habitat, including the last 200 acres. The Land Purchase Contingency component of the Supplemental Endowment fund provides a contingency for purchasing the last 200 acres of the required habitat, in the event the cost of habitat acres dramatically increases as the supply decreases. In this event, rather than imposing a large increase in the habitat fee for later fee payers, the Supplemental Endowment fund would be used to supplement the acquisition of the last 200 acres.

Future large spikes in land prices are not currently assumed in the model, so the Supplemental Endowment funds are not shown as being used for land acquisition. Rather, the model shows the Land Purchase Contingency component funds being transferred to the O&M Endowment fund once all required habitat land has been acquired. Thus, it is assumed the Supplemental Endowment Land Purchase Contingency component funds will be used to help fund ongoing administration, operations, and maintenance of the habitat, if they are not needed for land acquisition. The potential transfer of the Land Purchase Contingency component funds to the Endowment fund helps to keep the Admin/O&M and O&M Endowment fees lower.

The Changed Circumstance Contingency component funds are not assumed to be transferred to the O&M Endowment Fund after the purchase of all habitat. This component is treated differently in the model because a natural disaster, species listing changes, or other unforeseen circumstance would require additional funding, even after the acquisition of all habitat. The Changed Circumstances Contingency component is assumed to remain in place to provide revenue for unforeseen circumstances if needed.

Revenue Assumptions

Rice and Other Crop Revenue Estimates

Rice Revenue

The model assumes that rent revenue will be earned on 90 percent of the total rice acres in the habitat, with the remaining 10 percent assumed to be required fallow fields, which produce very low or no cash rents³. The model includes a revenue rate of \$350 per acre for years after 2021, consistent with the 2020 model. This estimate accounts for a blend of highly productive rice fields, which produce higher cash rents, and low-yielding rice land, which can produce lower rent yields.

Other Crop Revenue

It is assumed that 25 percent of the habitat upland acreage will be committed to commercial farming of crops other than rice, and the other 75 percent will not be farmed and will provide foraging vegetation for Swainson's Hawks. The average annual revenue rate for crops other than rice is estimated at \$50 per acre, consistent with last year's model. This estimate is based on TNBC's actual earnings from non-rice farm leases in recent years.

Miscellaneous Revenues

Miscellaneous revenues, which can include, but are not limited to, contract payments, various reimbursements, and hunting revenues, are estimated at \$25,000 annually for 2022 and beyond. The 2020 and 2021 miscellaneous revenues are estimates from TNBC based on TNBC's knowledge of realized and expected revenue through 2021.

³ The 2003 NBHCP requires that 10 percent of all mitigation land holdings used to produce rice will be fallowed each year.

Investment Earnings

Investment income is calculated for all funds. It is estimated differently for different years, as summarized below.

2020

For the Land Acquisition, R&E, and Admin/O&M funds, 2020 investment income is estimated as the interest earnings from the September 2020 financial statements. For the O&M Endowment and Supplemental Endowment Funds, the 2020 investment income is obtained from the September 2020 financial statements and is adjusted to estimate another three months, based on the average monthly earnings through September 2020.

2021

Investment income for 2021 is projected by applying various percentages, depending on the particular fund, to the September 2020 fund balances. These percentages are listed below:

- Land Acquisition: 1.00%
- R&E: 1.00%
- Admin/O&M: 1.00%
- O&M Endowment: 3.00%
- Supplemental Endowment: 3.00%

2022 through 2053

Investment income projected for 2022 and beyond is estimated as three percent of the prior year's ending balance. While this rate may be more or less applicable in the short term, the interest rate is appropriate for use over a long period of time. This interest rate represents a "real rate of return." Because the cost and revenue projections in the model are expressed in constant dollars and exclude inflation, the projected annual return on investments also should exclude inflation. The assumed real rate of return of three percent, used to project investment income, represents the annual rate of return that could be expected over and above inflation.

Development Assumptions

It is assumed that all development will be achieved by 2051, with 16,625 acres of the total 17,500 acres developed. This estimated level of development reflects an allowance for unusable acres of five percent (875 acres) of the total developable acres, as shown in **Table 17**. The inclusion of unusable acres was an updated assumption in the 2018 model based on conversations with TNBC staff. As development continues to occur throughout the Basin, a number of parcels have become increasingly less likely to develop.

Under the assumption that 875 of the 17,500 acres will not develop, it is also assumed that the associated 437.5 acres of habitat needed to satisfy the mitigation requirement of one-half acre of habitat per one acre of development will not be acquired. This reduction in habitat acres ensures that the mitigation ratio of one acre of development to one half acre of mitigation land is maintained and that the anticipated development will not be required to mitigate for more than one-half of an acre of habitat for each acre of development.

Habitat Acquisition and Conversion

Table 18 details the habitat acquisition schedule. This schedule was updated to reflect habitat acquisitions made or projected over the last year and to update the projected annual habitat acquisitions in future years. In 2020, 513 habitat acres were acquired. TNBC anticipates that it will not acquire any additional habitat until 2025, at which time, it will begin to annually acquire the number of habitat acres needed to keep pace with the habitat required for the projected annual development levels.

The corresponding projected habitat conversion schedule for converting habitat acres to upland and marsh also was updated. **Table A-3** details this schedule. As detailed previously in the discussion of rent revenue, TNBC estimates that approximately 110 rice acres will be converted to marsh in both 2022 and 2023, and 50 rice acres will be converted to marsh in 2024. Beginning in 2025, the model is based on the assumption that enough rice acres will be converted to marsh and upland so that the mitigation land use allocation required by the NBHCP (25 percent marsh, 50 percent rice, and 25 percent upland) will be achieved by the time fees have been paid for all acres of development and will be maintained thereafter.

Note that **Table 18** includes an adjustment to the NBHCP habitat acreage to account for required supplemental mitigation (mitigation required of non-NBHCP fee payers). As an example, in 2017, the NBHCP acreage was reduced by 28 acres to adjust for required supplemental mitigation for the Pacific Gas and Electric Company (PG&E). PG&E is not in the NBHCP area but was required to pay NBHCP mitigation fees for 56 acres of development and to provide 28 acres of habitat.

As shown in **Table 18**, the NBHCP habitat has been reduced by approximately 273 acres to allow for the required supplemental mitigation TNBC must provide from its habitat holdings.

Table 19 shows the current habitat status, including the current number of rice, marsh, and upland acres and the division between NBHCP mitigation and supplemental mitigation.

Summary

The proposed 2021 fee is \$40,673 per acre, an increase of \$641 over the current 2020 fee. This increase is largely attributable to an increase in administration and habitat maintenance costs (2022 through 2053), which increased by approximately 9.6 percent and 17.2 percent, respectively. These cost increases were offset by cost decreases in other components. In particular, the estimated remaining property taxes decreased by approximately 11.1 percent. As a result, there was only a small overall increase of approximately 2.3 percent in the total remaining costs for all of the Admin/O&M components combined and a subsequent increase of 1.6 percent in the overall fee.

The administration costs increased primarily because of the addition of a new TNBC staff position needed to perform additional administration tasks required because of the growth TNBC recently experienced and expects to continue to experience. The habitat maintenance costs increased due to updated land maintenance contract costs reflective of new land maintenance pricing resulting from a competitive process to select a new contractor for a three- to five-year contract. The remaining property taxes decreased because a large amount of habitat (over 513 acres) was acquired in 2020, locking in property taxes at an estimated lower level than if the habitat had been acquired in later years, as projected in the previous model.

fee sum 1

[1] Administration/O&M and O&M Endowment fees are set based on the cash flow analysis, ensuring that fund balances are positive in year 50 (2053) and that annual interest earnings in the endowment fund equal the drawdown by the Admin/O&M fund in 2053. See **Tables 7-15** for Admin/O&M cost assumptions.

[2] In some cases HCP fee payers may dedicate land to satisfy the land acquisition component of the NBHCP. Any land dedication will be subject to the terms of the NBHCP.

**Table 5
NBHCP 2021 Fee Update
Land Acquisition Cost (2021\$)**

2021 Fee Update
*17,500 developable acres; 95% assumed to develop
 1/2 acre of mitigation land per gross acre of developed land
 25% marsh, 50% rice, 25% other*

Item	Cost per Acre	Assumed in Financial Analysis	Notes
In-Basin Lands	\$30,000	100%	Price based on a review and analysis by a real estate appraiser of recent sales transactions and on consultations with landowners and real estate brokers.
Out-of-Basin Lands	NA		
Average Land Value	\$30,000		Assumes all acquisition occurs at the average in-basin land value.
Plus Transaction Costs and Contingency	\$1,500		Includes pre-acquisition field reconnaissance, surveys, Phase 1 environmental report, legal fees, and closing costs. Transaction costs assumed at 1/2 of total, contingency at 1/2 of total.
Average Land Acquisition Cost per Acquired Acre	\$31,500		Beginning in 2021

NBHCP 2021 Fee Update
Restoration and Enhancement Assumptions (2021\$)

2021 Fee Update
17,500 developable acres; 95% assumed to develop
1/2 acre of mitigation land per gross acre of developed land
25% marsh, 50% rice, 25% other

Item	Estimated Cost Per Acquisition	Estimated Cost per Habitat Acre	Note
Biological Site Assessment and Pre-Construction Survey			
NBHCP Biological Site Assessment	\$15,000	\$150 Per Acquired Acre assumes an average of 100 acres per acquisition.	Baseline Biological site assessments for: -Tri-Colored Blackbird -Valley Elderberry Longhorn Beetle -Delta Tule Pea -Sanford Arrowhead Assessment for Species Introduction: -Delta Tule Pea -California Tiger Salamander -Western Spadefoot Toad -Pond Turtle -Sanford Arrowhead -Vernal Pool Plant Species, -Other Covered Plant Species
NBHCP Pre-Construction Survey	\$12,000	\$120 Per Acquired Acre assumes an average of 100 acres per acquisition.	Formal pre-construction site survey for restoration and enhancement, including: -Assessment of Swainsons Hawk nest disturbance -Assessment of Other Avian Species nest disturbance -Assessment of Valley Elderberry Longhorn Beetle
Subtotal Biological Site Assess. & Pre-Construction Survey	\$27,000	\$270 per habitat acre	Note [1]
Restoration and Enhancement Conversion Costs [2] [3]			
Expended at Time Land Is Acquired			
	<u>Use of Land</u>	<u>Initial Cost</u>	<u>Weighted Cost [5]</u>
Marsh	0%	\$0	\$0 Note [2], [3]
Existing Rice	90%	\$0	\$0 Note [3]
Dry Converted to Rice	0%	\$0	\$0 Note [3]
Other Upland	10%	\$0	\$0 Note [3]
Subtotal	100%		\$0
Expended at Time Land Is Converted			
Rice/Other Converted to Marsh	25%	\$9,000	\$2,250 Note [4], [5]
Rice Converted to Upland/Other	15%	\$300	\$45 Note [5]
Subtotal Restoration and Enhancement Conversion Costs			\$2,295
Subtotal of All Restoration and Enhancement Costs per Acre			\$2,565
Restoration and Enhancement Contingency per Acre (10%)			\$257
Total Restoration and Enhancement Costs per Acre			\$2,822

re assumps

Source: The Natomas Basin Conservancy.

[1] A formal biological site assessment and pre-construction survey are required by the Final HCP -- April 2003.

[2] Initial marsh land estimated at 0% because TNBC estimates that little to no marsh land is available for acquisition. Rice land will be converted to marsh.

[3] Initial costs of all types of habitat land have been set to zero as no initial restoration or enhancement costs are anticipated.

[4] Based on estimates from Westervelt Ecological Services, as provided by TNBC staff.

[5] The cost of restoration and enhancement is weighted by the percentage of acres assumed to be converted or used for that particular land use.

**Table 7
NBHCP 2021 Fee Update
Admin./Operations and Maintenance Assumptions (2021\$)**

2021 Fee Update
17,500 developable acres; 95% assumed to develop
1/2 acre of mitigation land per gross acre of developed land
25% marsh, 50% rice, 25% other

Item	Amount	Notes
Operations and Maintenance Costs		
Marsh Operations and Maintenance		
Land Maintenance	\$559.37 per marsh acre	Land Maintenance estimated costs of \$363,240 plus a 10% contingency divided by the current habitat size of 714 marsh acres (including supplemental mitigation).
All Habitat Operations and Maintenance		
TNBC Costs	\$52.61 per acre	See Table 8
Fixed Assets	\$21.20 per acre	Based on TNBC's inventory of fixed assets (see Table 9)
Subtotal All Habitat Acres	\$73.82 per acre	
Select Special Assessments		
NCMWC	\$99.55 per acre	See Table 10 .
Bureau of Reclamation	[1]	Water service for Huffman West and Lauppe South
Reclamation District #1000	\$13.65 per acre	See Table 11 .
Subtotal	\$113.20 per acre	
Property Taxes for Existing Habitat	\$58.48 per acre	See Table 11 .
Preparation of Site Specific Management Plan	\$160 per acquired acre	Based on information from contracts regarding cost of SSMPs prepared to date. For cash flow modeling, applies to 2022 and beyond.
Update of Site Specific Management Plan	\$25,000 per year	Based on expected costs. For cash flow modeling, applies to 2022 and beyond.
Mitigation Monitoring and Adaptive Management		
One-Time/Fixed Costs	\$125,000 in 2027	See Table 13 for detail; ongoing monitoring costs increase by 3% every 5 years until habitat buildout. Current contract is through 2022, so next increase is in 2023.
On-Going Monitoring	\$332,946 per year	
Administrative Costs	\$1,373,594 per year	See Table 14 .
Endowment Fund Management Fees		
First \$5 Million of Fund Balance	0.50% of \$5 Million	See Table A-7 and Table A-8 . These annual percentages apply to the Endowment and Supplemental Endowment combined fund balances.
Remaining Fund Balance	0.35% of Remaining Fund Bal.	
Operations and Maintenance Revenues		
Crop Land Leases		
Planted Rice Base Acreage	\$350 per acre	Estimate of average revenue per rice acre for 2022+
Other Crops	\$50 per acre	Estimate of average revenue per upland/other acre; revenue on 25% of other/upland acres
Miscellaneous Revenue	\$25,000 per year	

om assumps

Source: The Natomas Basin Conservancy.

[1] Bureau of Reclamation provides water service to the Huffman West and Lauppe South properties at a cost of \$6,400 annually. As this cost allocated to all acres is negligible, it has been excluded from this analysis.

Source: NCMWC and TNBC

- [1] Rates based on an estimated 3 percent increase from NCMWC 2020 rates.
 [2] Water toll and winter water rates vary by land usage. It is assumed that the farmer pays the full rate directly for both rice and uplands acreage. Winter water rates reflect NCMWC rice straw decomp rates.
 [3] Includes supplemental mitigation acres and taxes. Excludes easements (143.1 acres).

dev

[1] Excludes 200 acres of development required to pay supplemental habitat fees.

[2] Acres of development are for SYSCO project, which pre-paid fees in 2005.

[3] Includes an allocation of acres deemed unlikely to be developed assumed at 5% of total acres.

hab acq

[1] Annual and cumulative totals exclude supplemental mitigation. The adjustments are for acres that are required for supplemental mitigation.

[2] Includes an adjustment to account for 42.83 acres of habitat land that is reserved or unused for specific future development. This includes 10.72 acres for Opus West, and 32.11 acres for Brookfield.

hab stat

- [1] Hunting lease assigned to seller of property for extended term as a condition of property sale.
- [2] Hunting precluded by Sacramento County "No Shoot Zone" ordinance.
- [3] Not hunted for safety reasons.
- [4] Verona property was acquired as an easement in 2018. In 2020, the property converted to standard NBHCP mitigation acres. Total acres are included in the easement total.
- [5] Supplemental acres in addition to Metro Air Park mitigation and easements, which are not included in the Regular Mitigation section.
- [6] Fallowed rice is included in the rice column.

**Table 20
NBHCP 2021 Fee Update
TNBC 2021 Budget Proposal**

2020 Est. Amount	2021 Budget Amt	Line item	Notes on 2021 Budget Amount	Table in NBHCP Fee Update Model for 2022+	Source of 2020 Estimated Amount
I. Revenue					
\$187,700	-	Mitigation fees-Sacramento	Assumes 0 acres of development in the City for which NBHCP fees will be paid. The budgeted fee amount is calculated based on the proposed 2021 fee per acre. Includes a reduction of 2% to account for the administration share retained by the City.	Table 2: proposed fee per acre by fee component. Table 17: annual development projections.	Estimated 2020 year-end budget provided by TNBC
-	-	Mitigation fees-Sutter County	Assumes 0 acres of development in Sutter County for which NBHCP fees will be paid. The budgeted fee amount is calculated based on the proposed 2021 fee per acre.	Table 2: proposed fee per acre by fee component. Table 17: annual development projections.	Estimated 2020 year-end budget provided by TNBC
\$5,315,095	\$2,712,500	Mitigation fees-Metro Air Park	Assumes 100 acres of development for Metro Air Park. The budgeted fee amount is calculated based on the proposed 2021 fee per acre.	Table 2: proposed fee per acre by fee component. Table 17: annual development projections.	Estimated 2020 year-end budget provided by TNBC
\$0	\$50,000	Mitigation Fees - Other	Additional one-time projects surface from time-to-time and this is a budgeted project placeholder. One such project could exceed this amount or no such funds could be received.	Table A-7: included in estimated annual fee revenue.	Estimated 2020 year-end budget provided by TNBC
\$55,834	\$40,000	Investment income-land acquisition fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2021, assumes 1.00% of prior year estimated fund ending balance.	Table A-4: estimated annual interest earnings	September 2020 Statement of Activities
\$27,959	\$50,000	Investment income-admin/o&m fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2021, assumes 1.00% of prior year estimated fund ending balance.	Table A-7: estimated annual interest earnings	September 2020 Statement of Activities
\$36,100	\$30,000	Investment income-restoration and enhancement fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2021, assumes 1.00% of prior year estimated fund ending balance.	Table A-6: estimated annual interest earnings	September 2020 Statement of Activities

**Table 20
NBHCP 2021 Fee Update
TNBC 2021 Budget Proposal**

2020 Est. Amount	2021 Budget Amt	Line item	Notes on 2021 Budget Amount	Table in NBHCP Fee Update Model for 2022+	Source of 2020 Estimated Amount
\$1,692,839	\$850,000	Investment income-endowment fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2021, assumes 3% of prior year estimated fund ending balance.	Table A-8: estimated annual interest earnings	September 2020 Statement of Activities; multiplied by 12/9 to include est. for Oct. - Dec.
\$128,820	\$80,000	Investment income-supplemental endowment fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2021, assumes 3% of prior year estimated fund ending balance.	Table A-9: estimated annual interest earnings	September 2020 Statement of Activities; multiplied by 12/9 to include est. for Oct. - Dec.
\$845,000	\$960,444	Farm rent	Projected cash rent for farms currently under contract. Includes hunting revenue. In future years, rice rent is based on the model assumptions of \$350 per acre on 90% of rice acres, and rent for other crops is based on \$50 per acre on 25% of upland acres.	Table 7: assumptions for years after 2021. Table A-7: estimated annual rice and upland acres.	TNBC estimate based on actual and projected revenue through 2020.
\$2,000,000	\$0	Miscellaneous income - City of Sacramento Line of Credit	In April 2020, the City of Sacramento approved a line of credit to be used for the purpose of land acquisition and will be repaid using the land acquisition portion of fee paid revenues within the City of Sacramento.	Table A-4: One time Miscellaneous Revenue item in 2020.	Based on information included in the promisory note between TNBC and the City of Sacramento, dated April 2020.
\$755,373	\$203,578	Miscellaneous income	SAFCA contract payments, and various reimbursements. Includes farmer reimbursements and groundwater exchange program with NCMWC.	Table A-7: estimated annual income of \$15,000.	TNBC estimate based on actual and projected revenue through 2020.
\$11,044,720	\$4,976,522	Total revenue

II. Expenditures					
Administration					
Administrative					
\$454,600	\$545,065	Staff	This includes six staff members: Executive Director, Chief Financial Officer, Contracts and Compliance Manager, Accounting and Records Specialist, Receptionist and Field Services Assistant. (Included for potential salary adjustments is 3%.)	Table 14	TNBC estimate based on actual and projected cost through 2020.
\$148,800	\$177,555	Benefits and charges	Includes statutory wage payments, employment taxes (Social Security, Medicare, California Unemployment Insurance and Employment Training Tax) and benefits. Includes group health insurance plan that is ACA-compliant at the Silver level (employer-sponsored high deductible health insurance plan with a health savings account including spouse and dependant coverage of 50%; annual out-of-pocket maximum with participating providers is approximately \$6,500 per individual). This also includes a health reimbursement plan for one employee for reimbursement of Medicare & Medicare Supplement Insurance. The retirement plan, Simplified Employee Pension-Individual Retirement Account, involves no on-going liability to the Conservancy after employee separation and can be discontinued in any year by action of the Board. Eligibility for participation in the plan at 13% of gross salary begins after completion of six months employment.	Table 14	TNBC estimate based on actual and projected cost through 2020.
\$7,500	\$8,000	Board expense	Includes a \$100/meeting fee (covers meeting and Board service expenses). Anticipates 10 Board members for entire year plus committee meetings. Includes small amount for miscellaneous Board-associated expenses.	Table 14	TNBC estimate based on actual and projected cost through 2020.

\$8,984	13,542.79	Fees - Supp. Endowment Fund	General corporation fees and investment management fees.	Table A-9	September 2020 Statement of Activities; multiplied by 4/3 to include est. for one additional quarterly payment.

48

**Table 20
NBHCP 2021 Fee Update
TNBC 2021 Budget Proposal**

2020 Est. Amount	2021 Budget Amt	Line item	Notes on 2021 Budget Amount	Table in NBHCP Fee Update Model for 2022+	Source of 2020 Estimated Amount
Contract work, monitoring, and contingency					
\$208,000	\$378,570	Contract work, public education, and publications	This item includes general contract work, public education and publications, including \$20,000 for Clean Water Act compliance, \$20,000 for participation in Basin-wide security services. Also, includes channel clearing pre-construction design and engineering on Cummings Bennett North tracts.	Table 15	Estimated 2020 year-end budget provided by TNBC
\$0	\$78,310	Contingency	5% contingency on above administrative expense items (excluding endowment and supplemental endowment fees).	Table 15	No contingency included for 2020 as 2020 values are based on spending through Sept. 2020.
\$330,000	\$399,564	Land Management	This is based on the land management contract approved by the Board, including a 10 percent contingency.	Table 7	Estimated 2020 year-end budget provided by TNBC
\$315,826	\$315,826	Biological monitoring	2018-2022 contract amount with ICF International plus connectivity and adaptive management. Pertains exclusively to biological monitoring as required by the 2003 NBHCP. Amount may change based on completion and implementation of the Biological Effectiveness Monitoring Program.	Table 13	2018 contract amount with ICF International plus connectivity and adaptive management.
\$20,000	\$75,000	SSMP Preparation and Revision	Estimated amount by TNBC for SSMP. In future years, subject to model assumptions.	Table 7: estimated cost per acquired acre.	Estimated 2020 year-end budget provided by TNBC
Mitigation land					
\$6,853,700	-	Mitigation land	For 2021 there are no mitigation land purchase requirements. Most land acquisition is covered by the "dedication" requirement, so there will be no direct outlay of cash proposed. Even if the dedication is not required, because the Conservancy has 12 months to mitigate fee-paid land, there is a good deal of fungibility.	Table 5: estimated cost per acre. Table 18: estimated annual acres acquired.	September 2020 Statement of Activities

49

**Table 20
NBHCP 2021 Fee Update
TNBC 2021 Budget Proposal**

2020 Est. Amount	2021 Budget Amt	Line item	Notes on 2021 Budget Amount	Table in NBHCP Fee Update Model for 2022+	Source of 2020 Estimated Amount
69,456	-	Loan repayment Loan repayment	In April 2020, the City of Sacramento approved a line of credit to be used for the purpose of land acquisition and will be repaid using the land acquisition portion of fee paid revenues within the City of Sacramento.	Table A-5: calculation of ongoing repayments made to the City of Sacramento.	September 2020 Statement of Activities
\$216,326	\$272,549	Operations Property taxes	This estimate is based on the 2020/21 tax bill for general property taxes and other levies and includes a 3% increase for the second half of 2021. This figure also includes the amount assessed for the Sutter County Williamson Act reductions but excludes RD 1000.	Table 11	Property taxes paid in 2018 (one-half of taxes on 2017/18 property tax bill plus one-half of the 2018/19 property tax bill.)
\$350,000	\$410,657	Water -- RD 1000 and NCMWC	For RD 1000, the actual 2020/2021 assessment was used to estimate the 2021 costs. No increase was assumed for the second half of 2021. The Natomas Mutual Water Company's assessment rate for 2021 is projected based on an increase of approximately 3% from the 2020 total assessment.	Table 10: NCMWC estimated cost per acre. Table 11: RD-1000 estimated cost per acre. Table A-7: estimated annual acres including supplemental mitigation.	RD-1000: TNBC estimate based on actual and projected costs through 2020. NCMWC: TNBC estimate based on actual and projected costs through 2020.
\$411,123	\$420,000	Property maintenance	General property maintenance items include: fences, signs, road repair and maintenance, weed control, and general site repairs.	Table 8: estimated operations and maint. cost per acre. Table 9: estimated fixed asset reserve costs per acre. Table A-7: estimated annual acres including supplemental mitigation.	Estimated 2020 year-end budget provided by TNBC
\$10,055,916	\$3,636,019	Subtotal			
-	\$25,000	Restoration and enhancement	Restoration and enhancement projects scheduled for 2021 are as follows: pre-marsh conversion permitting and planning on Bianchi West and Frazer South tracts. In anticipation of SAFCA marsh conversion project.	Table 6: estimated costs per acre Table A-6: estimated annual restoration and enhancement acres.	September 2020 Statement of Activities
\$10,055,916	\$3,661,019	Total expenses

Sources: City of Sacramento and The Natomas Basin Conservancy.

[1] NBHCP habitat only. Supplemental mitigation excluded.

Projections of future habitat acquired annually are based on the projected amount of urban development for the year.

[2] The acres of rice converted to marsh through 2022 are amounts provided/projected by the Natomas Basin Conservancy.

In each remaining year, these acres are estimated as the number of acres needed to reach and maintain the specified percentage of marsh.

[1] Other crop revenue assumed on 25% of upland/other acres.

[2] The 2013 amount represents Metro Airpark catch-up fees from 2006.

[3] Interest is earned at 3.0% annually on % of the prior year's ending balance.

[4] SSMP Preparation Cost calculated at a rate of \$160 per acquired acre and Update Cost calculated at a rate of \$25,000 per year. See Table 7 for details.

[5] Represents Midpoint Program Review, assumed to occur in 2027.

[6] Monitoring costs assumed to increase by 3% every 5 years.
