**habitat**  
(hab-'i-tat') n. The place or environment where a plant or animal naturally or normally lives and grows.

**ACQUIRED ACCORDING TO NBHCP GUIDELINES:**

(in the following proportions)	
Rice	50%
Upland Reserve	25%
Managed Marsh	25%

**species**  
(spe-'shez, -sez) n. A class of individuals having common attributes and designated by a common name.

The purpose of the NBHCP is to promote biological conservation along with economic development and the continuation of agriculture within the Natomas Basin. The NBHCP establishes a multi-species conservation program to mitigate the expected loss of habitat values and incidental take of protected species that would result from urban development, operation of irrigation and drainage systems, and rice farming. The goal of the NBHCP is to preserve, restore, and enhance habitat values found in the Natomas Basin while allowing urban development to proceed according to local land use plans.
